

1 Minute Google

One Google tip every day

Gmail is getting rid of one of its most useful features

ACTION STEPS

- ✓ If you use Gmail, get ready to say goodbye to 'Send as'. Yes, that's right, Google is removing it.
- ✓ The 'Send as' option was genuinely described as one of Gmail's most useful features, and for anyone managing multiple email identities quickly, it was a massive time-saver. Efficiency just took a hit.
- ✓ Were you a big 'Send as' user? Tell me how this impacts you in the comments!
- ✓ There's no clear replacement mentioned, so if this was part of your daily routing, it's time to start planning for a workflow change. Adapt fast, or get left behind.

PRO TIP:

Pro-tip: Don't wait for Google to force your hand. Regularly review your email flow for areas to optimize, before features disappear!
