One Google tip every day

How Google's New Gemini Rates Work and How to Track Your Usage

ACTION STEPS

- ✓ Google just changed how they tally your Gemini usage quotas. Yep, they moved the goalposts.
- ✓ This means you probably won't get as many AI responses as you used to, without paying. Are you already seeing this in your Gemini? Let me know in the comments.
- ✓ And here's the kicker: the source doesn't say how to track your new usage, or where to find those settings. We can't fake it here.
- ✓ So, for now, just be aware: your free Gemini responses might be more limited. Keep an eye on official Google announcements for any new tracking features.

PRO TIP:

If you rely heavily on AI, always compare Gemini's free tier with alternatives.
